

김태완 Taewan Kim

Birth date : 2001/03/06

E-mail : kimtaeyan21@gmail.com

Phone : 010-2736-0996

Education

Kumoh National Institute of Technology

B.S. Computer Software Engineering

Mar.2020 - Feb.2026 (**with top honors**)

- ♦ Total GPA of **4.30/4.5**, Major GPA of **4.29/4.5** (credits taken : 131)

Internships

Knowledge and Language Engineering Lab (KLE Lab)

UNDERGRADUATE RESEARCHER

Jun.2023 – Feb.2025

- ♦ Studied both Rule-based NLP and Deep Learning-based NLP approaches.
- ♦ Participated in NLP application project called SIG(Special Interest Groups) during each academic break.

Extended Reality & Metaverse Lab (XRM Lab)

UNDERGRADUATE RESEARCHER

May.2025 – Nov.2025

- ♦ Collaborating on research to leverage Large Language Models (LLMs) for enhanced user interaction in Virtual/Augmented Reality (VR/AR) environments.
- ♦ Contributing to a research project on building a computer vision-based system for automatic traffic accident analysis.

Project Experience

Plot-Based Movie Recommendation System

TEAM MEMBER

Jul.2023 – Aug.2023

- ♦ First SIG project in KLE LAB.
- ♦ Crawled and preprocessed movie data from Naver Series On to build a dataset for recommendation.
- ♦ Implemented a keyword-based recommendation system using TF-IDF, cosine similarity, and Word2Vec for embedding

keywords.

- ♦ Learned the fundamentals of word embeddings and recommendation algorithms, and enhanced my teamwork and communication skills through active collaboration.

Dialogue Summarization System Using Discord Chatbot

TEAM MEMBER

Jan.2024 – Feb.2024

- ♦ Second SIG Project in KLE LAB.
- ♦ Developed a dialogue summarization system using a Discord chatbot, utilizing the Korean Dialogue Summarization Dataset from AI HUB.
- ♦ Studied and implemented various deep learning-based summarization models, gaining foundational knowledge in neural network architectures and NLP.
- ♦ Evaluated model performance using multiple metrics and contributed to the integration of the system with the Discord platform.

Review-based Cosmetic Feature extraction and searcher

TEAM LEADER

Sep.2024 – Dec.2024

- ♦ Led a team as part of the Capstone Design I course to develop a review-based search and feature extraction system for cosmetics over one semester.
- ♦ Utilized cosmetic review datasets from the Korean Academic Society of Business Administration and AI HUB.
- ♦ Fine-tuned the pre-trained KoBERT model for sentiment analysis on Korean cosmetic reviews and extracted key features from user feedback.
- ♦ Implemented a search engine using Elastic Search to enable efficient product discovery.
- ♦ Coordinated team activities, managed project timelines, and made key technical decisions as team leader.
- ♦ Achieved successful system deployment and gained practical experience in NLP model fine-tuning, search engine integration, and team leadership.
- ♦ Service URL : <https://revieweyes.ajb.kr/>
search example) 지성 선크림, 촉촉한 토너, 건성 크림 (keyword + category)

Medical Image Analysis for PKD Subtype Classification

TEAM MEMBER

July.2024 – Dec.2024

- ♦ Participated in a collaborative research project between academia and industry focused on developing artificial intelligence technologies for medical applications.
- ♦ Developed a medical image processing pipeline to classify polycystic kidney disease (PKD) subtypes (PKD1_Truncated, PKD1_non_Truncated, PKD2, etc.).
- ♦ Performed data preprocessing and applied deep learning techniques for kidney region segmentation and subtype classification.

Financial News Summarizer Using LLM Fine-Tuning

Personal Project

March.2025 – April.2025

- Utilized the deakeun-ml/naver-news-summarization-ko dataset from Hugging Face for financial news analysis.
- Engineered prompts with GPT-4 to extract structured fields (e.g., is_stock_related, positive_impact_stocks, reasons, keywords, summary) and generated high-quality training data.
- Fine-tuned the Llama 8B model using LoRA with Lama Factory.
- Developed practical skills in building and optimizing LLM fine-tuning pipelines.

Others

Camping site Reservation Web Application (Using React, Express JS)

Web/App Application for Earthquake Support Based on User Location (Using Spring Framework, React)

Smart Note with Generative Artificial Intelligence (Using WPF, C#)

Extracurricular Activity

Mentoring

- Mentoring Activity in Coding for Secondary Gifted Education Program in Gumi (2024)
- Mentoring in Data Structures (Spring Semester 2024)
- Mentoring in C++ Programming (Fall Semester 2024)

Club

- 12th Leader of "SOFT", Departmental Soccer Club (2024)

Skills

Programming Python, Java, C++, html, css, javascript, React, Express, Spring, FastAPI Framework etc.

Data Analysis / Deep Learning Numpy, Pandas, Matplotlib, seaborn, Skicit-learn, Pytorch, trl

Others Docker, Conda, Linux, UML

Others

Paper

- ♦ "Feature-based Beauty Product Search System through Feature Extraction from Reviews," Journal of Digital Contents Society (KCI), vol.26, No.6, pp.1721-1730, Jun.2025.

Awards

- ♦ Lee Jung-Yeon Scholarship for Academic Excellence
Awarded by Kumoh National Institute of Technology, 2024

English Proficiency

- ♦ 2025.02 – TOEIC 885

Certification

- ♦ 2025.03 - ADSP
- ♦ 2025.06 – 정보처리기사
- ♦ 2025.12 – SQLD
- ♦ 2026.01 – 한국사능력검정시험 1급

Patent application

- ♦ Method for Providing Result of Retrieval Based on Reviews and Server Performing the Method
(patent application number : 10-2025-00178132)
- ♦ A system and method for evaluating the competency of call center agents using artificial intelligence, based on a behavioral indicator framework.
(patent application number : 10-2025-0096129)

Military Service

- ♦ Army sergeant, honorable discharge . April.2021 - Oct.2022
